NOTE

The logo should be printed in Pantone© whenever possible, with CMYK values used when Pantone© is not available. When neither Pantone© or CMYK are available, the colours should be specified to match to Pantone©. RGB colours should only be used for digital applications.

COLOUR PALETTE OVERVIEW

The colour palette has been selected to work as a harmonious whole.

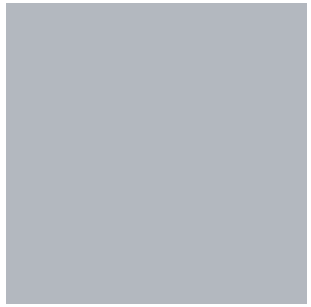

LIGHT TEAL

With its vibrant, contemporary energy, light teal introduces a sense of innovation and imagination to the palette.

LIGHT BLUE

Light blue imparts an optimistic, confident edge to the palette.

GREY

Grey acts as a neutralising counterpart to the chromatic hues in the rest of the palette, creating balance.

MID TEAL

Mid teal helps to balance the energy and enthusiasm of light teal, with the gravitas and poise of dark teal.

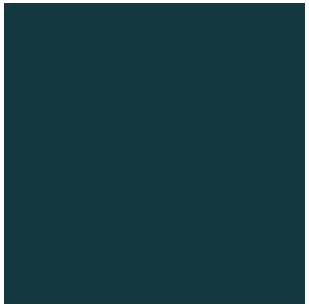

MID BLUE

Clear, crisp and competent, mid blue harnesses the buoyancy of light blue, with the credibility of dark blue.

WHITE

White is an important element within the palette. Its use is integral to creating a balanced composition, creating visual space and acting as a backdrop to the other colours in the palette.

DARK TEAL

Dark teal contributes sophistication and solidity to the palette, while communicating a strong sense of depth.

DARK BLUE

As the deepest tone in the palette, dark blue grounds the palette with a sense of maturity, stability and sincerity.
